## DETAILED ACTION

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (a) DNA species selected from the group consisting of SEQ ID NOS: 1-6
- (b) PNA species selected from the group consisting of SEQ ID NOS: 7-24
- (c) LNA species selected from the group consisting of SEQ ID NO: 25-33

Applicant is required, in reply to this action, to elect a single species corresponding to a single SEQ ID NO: to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1637

2. The claims are deemed to correspond to the species listed above in the following manner: The claims 33 and 34 correspond to the DNA species.

The claims 35 and 36 correspond to the PNA species and the claims 37 and 38 correspond to the LNA species.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species recited as a DNA species corresponding to SEQ ID NOS: 1-6 are structurally and physicochemically distinct one from the other. Likewise, the PNA species corresponding to SEQ ID NOS: 7-24 are structurally and physicochemically distinct one from the other and the LNA species are structurally and physicochemically distinct one from the other. The sequences of the different species are additionally structurally distinct from each other. Likewise, the different sequences of the DNA species, the PNA species and the LNA species can function irrespective of each other and each of the other species.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
